

Validation Output Observations Report

This report outlines the specific findings and technical discrepancies identified during the document validation process.

Executive Summary of Requirements

- **Excluded Documents:** Specific files designated in the logs should not undergo the validation process.
- **Optional Validation:** Certain documents are considered optional; while they will be validated upon upload, the results will not impact the final case verdict.
- **Member Verification:** For authorized member validation, the system must cross-reference all names received from the API against the document. Failure to locate all specified members must result in a rejection.

Technical Observations & Mapping Errors

Document ID	Observations & Critical Failures
..._00	Document identified for exclusion from validation.
..._01	Document identified for exclusion from validation.
..._02	Optional document; validation results are non-determinative for final verdict.
..._03	Critical: Identification failure for Company Name and Expiration Date. API Error: Missing unique entity ID in payload.
..._04	Requirement: System must verify all authorized members from API.
..._05	Failure to identify Company Name.
..._06	Failure to identify Company Name, Merchant Number, and Issue Date.
..._07	Failure to identify Company Name.
..._08	Failure to identify Company Name and Issue Date.

Document ID	Observations & Critical Failures
..._09	Failure to identify Company Name, Expiration Date, Merchant Number, and Agent Type.
..._10	Failure to identify Company Name, Issue Date, and EIN (cross-referenced against SSN).
..._11	Logic Error: Employer SSN was identified but incorrectly compared to EIN instead of RegistrationCertificateNumber.
..._12	Failure to identify Company Name, Expiration Date, and the last four digits of the SSN.
..._13	Mapping Errors: companyName and SSN/EIN fields were identified but not mapped to the corresponding API fields. Failure to identify Issue Date.
..._14	Failure to identify SSN and Issue Date.
